

AVG Anti-Virus Quick Guide

Run AVG often to keep your computer free of viruses and worms!

1. Connect to the Internet (dial up users only!)

2. Double-click the AVG icon on your desktop

3. Click "Check for Updates"

4. Click "Internet" (Check the check-box right above the button to skip this step next time!)

5. Wait for the update to finish.

If asked to update a component, click "Update"

6. From the main window, click "Scan Computer"

7. Wait for the scan to finish. This may take several minutes!

AVG may show informational boxes during the process. These are on a timer, so you do not need to be around to click them away!

8. When the scan is done, click the  to exit AVG.
